SUMMARY

Motivated B.Tech Computer Science and Engineering student with strong problem-solving abilities and a solid understanding of Data Structures and Algorithms. Passionate about learning new technologies, writing efficient code, and developing practical software solutions. Seeking an opportunity to apply technical skills, enhance knowledge, and grow as a software developer in a challenging environment.

Key Technologies

Languages: Java, JavaScript, Html, CSS

Frameworks: React.js, Node.js, Express.js

Databases: MongoDB, MySQL

Concepts: Data Structures, Algorithms, Computer Networks, DBMS, Operating System

Training / Internship

Front End Using React(Coding Blocks)

- Completed training in frontend web development using React for building dynamic and responsive user interfaces.
- Worked with core web technologies including HTML5, CSS3, and JavaScript to design responsive web pages.
- Implemented React Hooks such as useState and useEffect for efficient state management and lifecycle handling.
- Used Git and GitHub for version control and project collaboration.

Projects

CULT FITNESS APP - MERN

- Developed a Cult Fitness-style web application using MERN stack for booking fitness classes and managing workout plans.
- Implemented user authentication and authorization using JWT for secure login and registration.
- Built RESTful APIs with Node.js and Express and integrated MongoDB for storing user and booking data.
- Designed a responsive UI using React.js to improve user experience across devices.

CHAT APPLICATION - MERN

- Built a real-time chat application with responsive UI using React.js
- Implemented real-time messaging and media sharing with WebSockets.
- Integrated JWT-based authentication for secure user management.
